

User Stories

User Story 1 : Sign Up

Create an account with the email and the password

As user I want a form to sign up with an email and password in the application.

DDT:

- Funcionality
- UI
- Unit tests
- Code reviewed
- Pushed in Github
- Usability Tests:
 - Low Fidelity
 - High Fidelity
 - UI
- Deployed
- Tagged

CDA:

- The form validates the fields and allow to sign up clicking a button.
- The user is created (if the email hasn't been registered before) in Firebase/auth with an id.
- The email and the password are registered in the collection user in Firebase/store. The id of the document is the same id used in Firebase/auth.

User Story 2 : Sign In

Sign in the application

As user I want a form to sign up with an email and password or a button to sign in with google account

DDT:

- Funcionality
- UI
- Unit tests
- Code reviewed
- Pushed in Github
- Usability Tests:
 - Low Fidelity
 - High Fidelity
 - UI
- Deployed
- Tagged

CDA:

- The form validates the fields and allows to sign in clicking a button.
- The view allows to sign in with a google account clicking a button.
- Redirect the view to the home application

User Story 3 : Create a Post

The logged user can create a post

As user I want a form to write the post message.

DDT:

- Funcionality
- UI
- Unit tests
- Code reviewed
- Pushed in Github
- Usability Tests:
 - Low Fidelity
 - High Fidelity
 - UI
- Deployed
- Tagged

CDA:

- The form checks the fields and allows to create a post in the store (collection post) and UI.
- The post is created with no comments and no likes.

User Story 4 : Edit a Post

The logged user can edit his/her posts.

As user I want a form to edit the message of a post.

DDT:

- Funcionality
- UI
- Unit tests
- Code reviewed
- Pushed in Github
- Usability Tests:
 - Low Fidelity
 - High Fidelity
 - UI
- Deployed
- Tagged

CDA:

- The post is updated with the new content in the store (collection post) and the UI.
- If the content is empty alert the user if he/she wants to delete the post.

User Story 5 : Delete a Post

The logged user can delete his/her posts.

As user I want a button to delete a post.

DDT:

- Funcionality
- UI
- Unit tests
- Code reviewed
- Pushed in Github
- Usability Tests:
 - Low Fidelity
 - High Fidelity
 - UI
- Deployed
- Tagged

CDA:

- The post is deleted in the store (collection post) and the UI.

User Story 6 : Like a Post

The logged user can like once for each post.

As user I want a button (icon) to react with like or dislike a post.

DDT:

- Funcionality
- UI
- Unit tests
- Code reviewed
- Pushed in Github
- Usability Tests:
 - Low Fidelity
 - High Fidelity
 - UI
- Deployed
- Tagged

CDA:

- The user can react once for each post.
 - Like it
 - Don't like it
 - Love it
 - It's one of the best
 - Leaves me with doubts
- The reactions are counted for each post in the store and are showed in the UI.
